

From Steve Combes

[ESP NOTE: Steve did not supply a letter to our legislators, only his comments]

IF YOU LIKE A GARDEN OR BUY ORGANIC FOOD YOU BETTER GET ON THAT PHONE TO YOUR CONGRESS CRITTERS N O W !

There is an enormous rush to get this into law within the next 2 weeks before people realize what is happening.

Main backer and lobbyist is (guess who) Monsanto.

Bill will require organic farms to use specific fertilizers and poisonous insect sprays dictated by the newly formed agency to "make sure there is no danger to the public food supply".

This will include backyard gardens that grow food only for a family and not for sales.

THIS IS DICTATORSHIP in any way you look at it.

If this passes then NO more heirloom clean seeds but only Monsanto genetically altered seeds that are now showing up with unexpected diseases in humans.

There is a video on the subject.

[YouTube video on HR 875 and S 425](#)

The disarming name on this particular piece of evil corrupt crap is a lot like the "Gun Safety Act" that secretly meant "if we pick up all the guns then we will have gun safety".

The name on this evil food plan is:

Food Safety Modernization Act of 2009

(Really makes it sound like the feds are trying protect us. LIES)

Let me be crystal clear here.....

This has NOTHING to do with food safety. This is only about TOTAL CONTROL by the feds in our lives.

Get on that phone Monday and burn up the wires. Get anyone else you can to do the same thing.

The [expletive] in the House and Senate WILL pass this if they are not massively threatened with loss of their position.....and maybe pitchforks and torches.

Steve Combes
