## Getting More out of your Garden, Farm and Homestead through Permaculture Principles

Increase your garden's perennial food supply, with less watering, less weeding, and more sharing with your community. Find out processes to increase income from your property, and soil fertility, biomass, and longterm sustainability. Find out the new career trends for young to old, and ways to localize abundance in the scientifically proven design fields of permaculture.

**Kelly Ware** is a certified master gardener, permaculture design consultant and educator, community garden organizer.

- Hosted by: Essential Stuff Project (ESP) and Bigfork Emergency Resource Team (BERT)
- Thursday evening, April 17, 2014, 7 - 8 PM
- Bigfork Middle School Cafeteria (600 Commerce St, Bigfork MT)
